Dear Mr. Rayburn,

We have worked with you for over one year now, from the original idea for our product, to the development of our relationships and our business plan, to the current time when we are preparing to launch. I would like to express my sincere thanks and appreciation for your professionalism and the value of your input at every stage of this process. Your advice has been wise, you have delivered what you promised, your knowledge of the industry is clear, and you have made the experience painless and stress-free.
