To Whom It May Concern,

H₂O Dynamic Solutions was contracted by Springhill Freshwater Co. to assist us in the development of our new bottled water facility in Huntsville, Ontario. This involved writing a comprehensive business plan which outlined in detail all the steps involved in starting up a bottled water facility from scratch. H₂O Dynamic Solutions designed the bottling plant, developed our capital and operational budgets, sourced out all the equipment, designed our food and beverage safety programs (GMP & 2 HACCP programs), conducted all of the technical training to our staff (sanitation, quality control, SOP's, operation and maintenance of equipment, etc.), oversaw the installation of our two production lines and commissioned the start-up.

H₂O Dynamic Solutions conducted its duties in an extremely professional manner, and displayed excellent time and project management skills. Their knowledge of all aspects of the bottled water business and diligent hands on approach enabled us to obtain the highest honour given to members of Canadian Bottled Water Associations, the coveted award for "Excellence in Manufacturing" in our first year of operation.

H₂O Dynamic Solutions completed their contract with the Springhill Freshwater Co. on time and on budget. We will continue to use the services of H₂O Dynamic Solutions for any upcoming projects such as, upgrades and expansion to our production facility, as well as new product development.

It has been a great pleasure working with H₂O Dynamic Solutions and I would highly recommend them to anyone that requires assistance in the food and beverage industry. I believe their services to be of enormous value. Please do not hesitate to call me at the number below if you have any further questions.

Yours truly,

Ken Inglis

President
